SUMMARY

Frontend engineer with 4 years of commercial experience delivering React and Next.js applications on .NET backends for healthcare, business-platform and agency clients. I work well in large multi-team codebases — ticketed branches, code review, staged refactors — and as the lead or only frontend developer on greenfield products: a healthcare knowledge platform (27 screens, 551 automated tests), a rental marketplace (110 pages, SignalR chat) and the admin and doctor portals of a healthcare platform. I document what I build and have mentored two teammates.

SKILLS

Frameworks	React 19, Next.js (App Router), TypeScript, JavaScript, Vite, Astro, React Native (Expo)
Data & state	TanStack Query (React Query), Zustand, Redux Toolkit, REST, OpenAPI-generated types, React Hook Form, Zod
UI systems	Tailwind CSS, shadcn/ui, Radix UI, MUI, Mantine, PrimeReact, Storybook, Atomic Design, Arabic / English (RTL)
Testing & quality	Vitest, React Testing Library, Jest, Playwright, Storybook a11y checks, code review
Integration	ASP.NET Core / .NET APIs, SignalR, Firebase, Supabase, role- and permission-based access, MFA, cookie sessions
Process	Git, Bitbucket, GitHub, Jira, Azure DevOps, Figma, Agile / Scrum, technical documentation, AI-assisted development

EXPERIENCE

nWeave — Software Engineer (Frontend) 10/2025 – Present

Alexandria, Egypt · Healthcare and B2B SaaS products, client websites, mobile apps

AHS Medical Exchange — healthcare B2B platform · multi-team codebase (3.9k commits)

- Designed a **25-module TanStack Query layer** to replace a custom Axios hook across orders, invitations, messaging, staff and billing, and wrote the team's guide; the shared client and pattern are used for new features.
- Built a **billing-formula builder** that lets admins write pricing rules safely — a mathjs parser with an allowlist (no functions, no eval), live validation, divide-by-zero checks and a test panel.
- Worked in a 3.9k-commit, multi-team codebase through Jira-ticketed branches and code review, and **mentored two teammates**.

Smart FAQ System — knowledge platform for a healthcare operations client · lead frontend

- Delivered the frontend in three weeks — **27 screens, 3 roles with MFA and 551 automated tests** — as lead and main author (166 of 173 commits), using React 19, TypeScript and TanStack Query.
- Typed the full API contract (**94 endpoints**) from OpenAPI against an ASP.NET Core backend, and built an Atomic-Design component system with 75 Storybook stories and accessibility checks.
- Secured the app with a cookie session, antiforgery tokens on every write, capability-based routing and **MFA for admins**, and ETag checks so two admins can't overwrite each other.
- Cut admin-table re-render time from **~20 ms to ~2 ms** by rendering one layout per screen size, memoizing row menus and badges, and mounting menus on first open.

ONE14 QARDIO — Qur'an & running app, live on Google Play & App Store · product & technical lead

- Led product and technical direction for a React Native (Expo) and Firebase app: planned the features and UX, directed an AI-assisted build with a teammate, and owned on-device QA on iOS and Android.
- Led the fix for a **17% GPS distance under-count** (a 30 km run recorded as ~25 km) by moving tracking to 1 Hz high-accuracy fixes with a tuned software filter, field-tested against Strava and Apple Watch.
- Also built the OsLoop studio's 3D website (React Three Fiber, GSAP) through two client feedback rounds, and features on Boost-KGoal, ElevateMate and two agency sites.

Bites — Frontend Developer · Part-time 09/2025 – 04/2026

Remote · Cairo-based ERP-style business platform in Next.js 14 · 14-person team

- Built finance and sales modules for an ERP-style platform: invoices, bills, expenses, double-entry journal reports, sales orders, quotes, accounts and opportunities.
- Added OTP-verified e-signatures and the contract-creation workflow, and co-built a cinema booking module with seat selection and checkout.
- Shipped **190 commits to production in 7 months part-time** — second-most in a 14-person team — across invoicing, accounting and e-signature modules (Next.js 14, TanStack Query, React Hook Form, Zod, MUI).

Profound Agency — Frontend Developer 07/2024 – 09/2025

Alexandria, Egypt · Client products on .NET backends (Azure DevOps)

Spectra — healthcare services platform · admin and doctor portals

- Built the admin back office — client organizations, staff, master-data CRUD (drugs, diagnostics, departments, services), website content and **user permissions** — on a .NET backend.
- Built the doctor workspace: appointment calendar, patient records with prescriptions and reports, contracts, chats and wallet, with all 242 commits shipped to production.

okoRent — peer-to-peer rental marketplace · sole frontend developer

- Built a rental marketplace's **entire frontend alone — 110 pages** across guest, user, business and admin portals (336 of 364 commits) — with Next.js 14, TypeScript and TanStack Query.
- Added real-time chat and notifications with **SignalR**, and built booking, checkout and payments: a booking calendar, payment links, a wallet and invoices.
- Structured the data layer as 31 TanStack Query modules with URL-synced filters, shared loading and error states, and role-based route protection in Next.js middleware.

Freelance — Frontend Developer 02/2024 – 05/2025

Remote · alongside full-time roles · four clients

- Built bilingual (Arabic / English) Next.js 14 + TypeScript websites for four clients, including a Saudi trip-sharing app's site and a homework-help platform with Google sign-in and a user dashboard.

Aquadic — Frontend Developer 10/2022 – 07/2024

Alexandria, Egypt · Client websites and web apps

- Built **9 client websites and web apps** as the main frontend developer on each (~530 commits), from responsive HTML / CSS / JavaScript sites to Next.js 13 apps.
- Built a bilingual (Arabic / English, RTL) e-learning platform and a services marketplace with Firebase chat, SMS OTP sign-in and checkout in Next.js 13.

EDUCATION

B.Sc. Computer Science — Faculty of Science, Minia University 10/2018 – 06/2022
