SUMMARY

Senior Frontend Engineer with 4 years of commercial experience building React, Next.js and TypeScript applications for healthcare, business platforms and marketplaces. I led a healthcare knowledge platform's frontend from the first commit to delivery in three weeks, built a rental marketplace's entire frontend on my own (real-time chat, booking and payments), and shipped invoicing and e-signature modules in a 14-person team. I focus on component architecture, performance, secure access control and automated testing, and have mentored two teammates.

SKILLS

Frontend	React 19, Next.js (App Router), TypeScript, JavaScript, React Native (Expo), HTML5, CSS3
State & data	TanStack Query (React Query), Redux Toolkit, Zustand, REST APIs, OpenAPI-generated types, Supabase, Firebase
UI & architecture	Tailwind CSS, shadcn/ui, Radix UI, MUI, Mantine, Storybook, Atomic Design, responsive design, accessibility
Forms & validation	React Hook Form, Zod
Testing	Vitest, Jest, React Testing Library, Playwright, code review
Security & real-time	Role-based access control (RBAC), cookie-based authentication, CSRF protection, MFA, OTP, SignalR
Tools & workflow	Git, GitHub, Bitbucket, Jira, Figma, Agile / Scrum, AI-assisted development
Internationalization	next-intl, i18next, Arabic / English, RTL support

EXPERIENCE

nWeave — Software Engineer (Frontend) 10/2025 – Present

Alexandria, Egypt · Healthcare and B2B SaaS products, mobile apps

Smart FAQ System — knowledge platform for a healthcare operations client · lead frontend

- Built the frontend from the first commit and **delivered it in three weeks** as lead and main author — role-based access with MFA, an editorial review workflow and a full unit and component test suite — using React 19, TypeScript and TanStack Query.
- Secured the app with a cookie session, antiforgery tokens on every write, capability-based routing and **MFA for admins**, and ETag checks so two admins can't overwrite each other.
- Cut admin-table re-render time from **~20 ms to ~2 ms** by rendering one layout per screen size, memoizing row menus and badges, and mounting menus on first open.
- Typed the full API contract from OpenAPI against an ASP.NET Core backend, and built an Atomic-Design component system documented in Storybook with accessibility checks.

AHS Medical Exchange — healthcare B2B platform · large multi-team codebase

- Built a **billing-formula builder** that lets admins write pricing rules safely — a mathjs parser with an allowlist (no functions, no eval), live validation, divide-by-zero checks and a test panel.
- Designed a **TanStack Query layer** to replace a custom Axios hook across orders, invitations, messaging, staff and billing, and wrote the team's guide; the shared client and pattern are used for new features.

ONE14 QARDIO — Qur'an & running app, live on Google Play & App Store · product & technical lead

- Led product and technical direction for a React Native (Expo) and Firebase app: planned the features and UX, directed an AI-assisted build with a teammate, and owned on-device QA on iOS and Android.
- Led the fix for a **17% GPS distance under-count** (a 30 km run recorded as ~25 km) by moving tracking to 1 Hz high-accuracy fixes with a tuned software filter, field-tested against Strava and Apple Watch.
- Mentored two teammates through code reviews and pairing; built the OsLoop studio's 3D website (React Three Fiber, GSAP) through two client feedback rounds.

Bites — Frontend Developer · Part-time 09/2025 – 04/2026

Remote · Cairo-based business platform (finance, sales CRM, contracts) in Next.js 14

- **Shipped invoicing, accounting and e-signature modules to production** over 7 months part-time in a 14-person team (Next.js 14, TanStack Query, React Hook Form, Zod, MUI).
- Built the invoice builder (line items with live totals, payments, attachments, email tracking), plus bills, expenses, debit notes, receivables / payables and **double-entry journal reports**.
- Added **OTP-verified e-signatures** to contracts and invoices and built the contract-creation workflow; co-built a cinema booking module with seat selection, food ordering and checkout.

Profound Agency — Frontend Developer 07/2024 – 09/2025

Alexandria, Egypt · Client products on .NET backends

okoRent — peer-to-peer rental marketplace · sole frontend developer

- Built a rental marketplace's **entire frontend as the only frontend developer** — guest, user, business and admin portals — with Next.js 14, TypeScript and TanStack Query.
- Added real-time chat and notifications with **SignalR**, and built booking, checkout and payments: a booking calendar, payment links, a wallet and invoices.
- Structured the data layer as TanStack Query modules with URL-synced filters, shared loading and error states, and role-based route protection in Next.js middleware.

Spectra — healthcare services platform · admin and doctor portals

- Built the **admin and doctor portals** of a healthcare platform in Next.js 14: appointments, prescriptions, medical reports, contracts, staff, master data and user permissions.

Freelance — Frontend Developer 02/2024 – 05/2025

Remote · alongside full-time roles · four clients

- Built bilingual (Arabic / English) Next.js 14 + TypeScript websites for four clients, including a Saudi trip-sharing app's site and a homework-help platform with Google sign-in and a user dashboard.

Aquadic — Frontend Developer 10/2022 – 07/2024

Alexandria, Egypt · Client websites and web apps

- Built **9 client websites and web apps** as the main frontend developer on each, from responsive HTML / CSS / JavaScript sites to Next.js 13 apps.
- Built a bilingual (Arabic / English, RTL) e-learning platform and a services marketplace with Firebase chat, SMS OTP sign-in and checkout in Next.js 13.

EDUCATION

B.Sc. Computer Science — Faculty of Science, Minia University 10/2018 – 06/2022
